Acute Care Outbreaks

Health Sector Information Analysis and Reporting

Data in this report is up to November 12, 2021

REMINDER: These data represent a snapshot in time. There will be minor differences noted when comparing this report to previous reports.

Report Notes

- Outbreaks are declared at the discretion of the regional Medical Health Officer
- Data Source: Data used in this report is gathered and compiled from Regional Health Authorities and then supplied to the BC Centre for Disease Control. The BC Centre for Disease Control then submits this data to the Ministry of Health.
- Cases include lab-confirmed, lab-probable and epi-linked cases.
- Residents of other Canadian provinces/territories are reported by their provinces/territories of residence.
- When health authority of residence is not available, cases are assigned to the health authority reporting the case.
- Data on outbreaks might be incomplete or vary from what is reported publicly due to differing data sources.
- Data may not be complete or accurate as data may be unavailable, not yet available in the public systems or updates are occurring overtime.
- Inaccuracies may be noted when comparing between reports, and data should be interpreted with caution for those outbreaks that are still active.
- Providence Health Care is included within Vancouver Coastal Health data.
- Cases whereby preliminary case data is available but complete data is still forthcoming/ pending (whether the case is for a resident or staff member) are added to the Resident column and when complete information is available, moved to the staff column if it was a staff member.
- Cells with values less than or equal to 5 are suppressed – indicated by an X – to reduce risk of reidentification.

Report Definitions

- Health Authority (HA):
 - Fraser Health Authority (FHA)
 - Interior Health Authority (IHA)
 - Northern Health Authority (NHA)
 - Vancouver Coastal Health (VCH)
 - Island Health (VIHA)
- Case definitions can be found at: [http://www.bccdc.ca/health-professionals/clinical-resources/case-definitions/covid-19-\(novel-coronavirus\)](http://www.bccdc.ca/health-professionals/clinical-resources/case-definitions/covid-19-(novel-coronavirus)).
- Total cases = resident and patient cases + staff and other cases.
- Total deaths = resident and patient deaths + staff and other deaths.

REMINDER: These data represent a snapshot in time. There will be minor differences noted when comparing this report to previous reports.
