Physical distancing
Protect yourself, your loved ones and your community from COVID-19
March 23, 2020

Physical distancing means making changes in your everyday routines in order to minimize close contact with others.

Keeping about two metres apart when we are outside our homes is something we can all do to help stop the spread of COVID-19.

Here are some other tips to practice physical distancing while keeping up mental wellness:

- Greet with a wave instead of a handshake, kiss or hug
- Exercise at home or outside
- Get groceries and medicines at off-peak times
- Go for a walk with family or others you are living with
- Work from home
- Use food delivery services or online shopping
- Go outside for some fresh air
- Use public transportation at off-peak times
- Have kids play in the backyard or park

Remember to:
- Stay at home when you’re sick, even if symptoms are mild
- Avoid crowded places and non-essential gatherings
  - No play dates, group walks, basketball games or gathering on the beach
- Take care of your mental well-being through checking in with loved ones and self-care
- Cough and sneeze into your elbow or sleeve
- Wash your hands regularly
