WARNING

BC Centre for Disease Control
An agency of the Provincial Health Services Authority

Overexposure to Ultraviolet Radiation (UV) causes skin and eye burns. UV exposure can be hazardous to your health and, in the long term, can contribute to premature skin aging and skin cancer. UV effects are cumulative. Greater risks are associated with early and repeated exposure. Drugs and cosmetics may increase UV effects.

Adapted from the *Radiation Emitting Devices Regulations*, CRC, c.1370 Part XI Tanning Equipment 5.(c)(iii)

THIS SIGN TO BE POSTED IN PLAIN VIEW OF CUSTOMER PRIOR TO UNDERGOING ULTRAVIOLET EXPOSURE.
