

BC Centre for Disease Control
An agency of the Provincial Health Services Authority

Consultants

From time to time, we receive inquiries from operators or owners of diagnostic x-ray facilities (medical, dental, veterinary, chiropractic procedures) regarding shielding requirements because their facilities do not fit the criteria on which our shielding guidelines are based. In cases where our guidelines cannot be applied directly, the facility operator or owner may wish to contract the services of anyone of the following consultants:

Disclaimer: The following is a list of individuals and businesses that perform radiation protection services for clients.
