BCCDC will autosubstitute product as required.

This form is available at: <http://www.bccdc.ca/health-professionals/professional-resources/vaccine-pharmacy-services>

¹ Minimum stock level - minimum number of doses to be always on hand - e.g. 1 month supply

² Doses on Hand - number of doses on hand at date of order (counted in fridge)

³ Doses requested - number of doses requested from BCCDC, considering age cohort and upcoming clinics.

Inventory re-ordering formula:

Minimum stock level - doses on hand = doses requested

Example, 100 doses - 50 doses in the fridge = re-order 50 doses
