Potential allergens: polysorbate 80, ovalbumin, neomycin, kanamycin, hydrocortisone (See SPECIAL CONSIDERATIONS).
Other components: potassium chloride, potassium dihydrogen phosphate, disodium phosphate dihydrate, magnesium chloride hexahydrate, calcium chloride dihydrate, formaldehyde, cetyltrimethylammonium bromide (CTAB), barium, squalene, sorbitan trioleate, sodium citrate, citric acid.

PRECAUTIONS:
Severe oculo-respiratory syndrome (ORS) after a previous dose of influenza vaccine. B

---

A Per Provincial Health Officer recommendation, this vaccine may be offered to those 50-64 years of age, if an age appropriate vaccine is not available. Additional informed consent should include information that this product has not been authorized by Health Canada for use in this age group, and recipients may experience a higher rate of side effects, especially pain at the injection site, than with standard formulation influenza vaccine.

B See Safety Issues Applicable to Influenza Vaccines, 2. Oculo-Respiratory Syndrome (ORS).
Trivalent Inactivated Influenza Vaccine (Inactivated Subunit, Adjuvanted) (TIIV)  
FLUAD®  
Supplier: Seqirus Canada Inc.

SPECIAL CONSIDERATIONS:
Egg allergic individuals (including those who have experienced anaphylaxis following egg ingestion) can be immunized with inactivated or live attenuated influenza vaccine in any setting attended by immunization service providers who are following standard vaccine administration practice. ^

ADVERSE EVENTS:
Local: pain, warmth, redness, swelling, induration. Pain and warmth occur more often than after non-adjuvanted vaccines.
Systemic: headache, fatigue, malaise, myalgia, arthralgia, chills, nausea. Fewer than 1 in 20 people may develop oculo-respiratory syndrome (ORS). Symptoms include red eyes, a cough, and/or sore throat and/or hoarseness.
