♦ The hepatitis A and polio vaccines are not included in this table. The hepatitis A vaccine is available for Aboriginal adults that are 18 years of age and other eligible individuals. The polio vaccine is only recommended for unimmunized adults who are at risk of exposure to polio virus. Speak with your healthcare provider for more information.

‡ Two doses of MMR vaccine are recommended for adults born in 1970 or later.

* See the HealthLinkBC Files for more information on vaccine eligibility or speak to your health care provider.
