

MERS-CoV Epidemic Curve

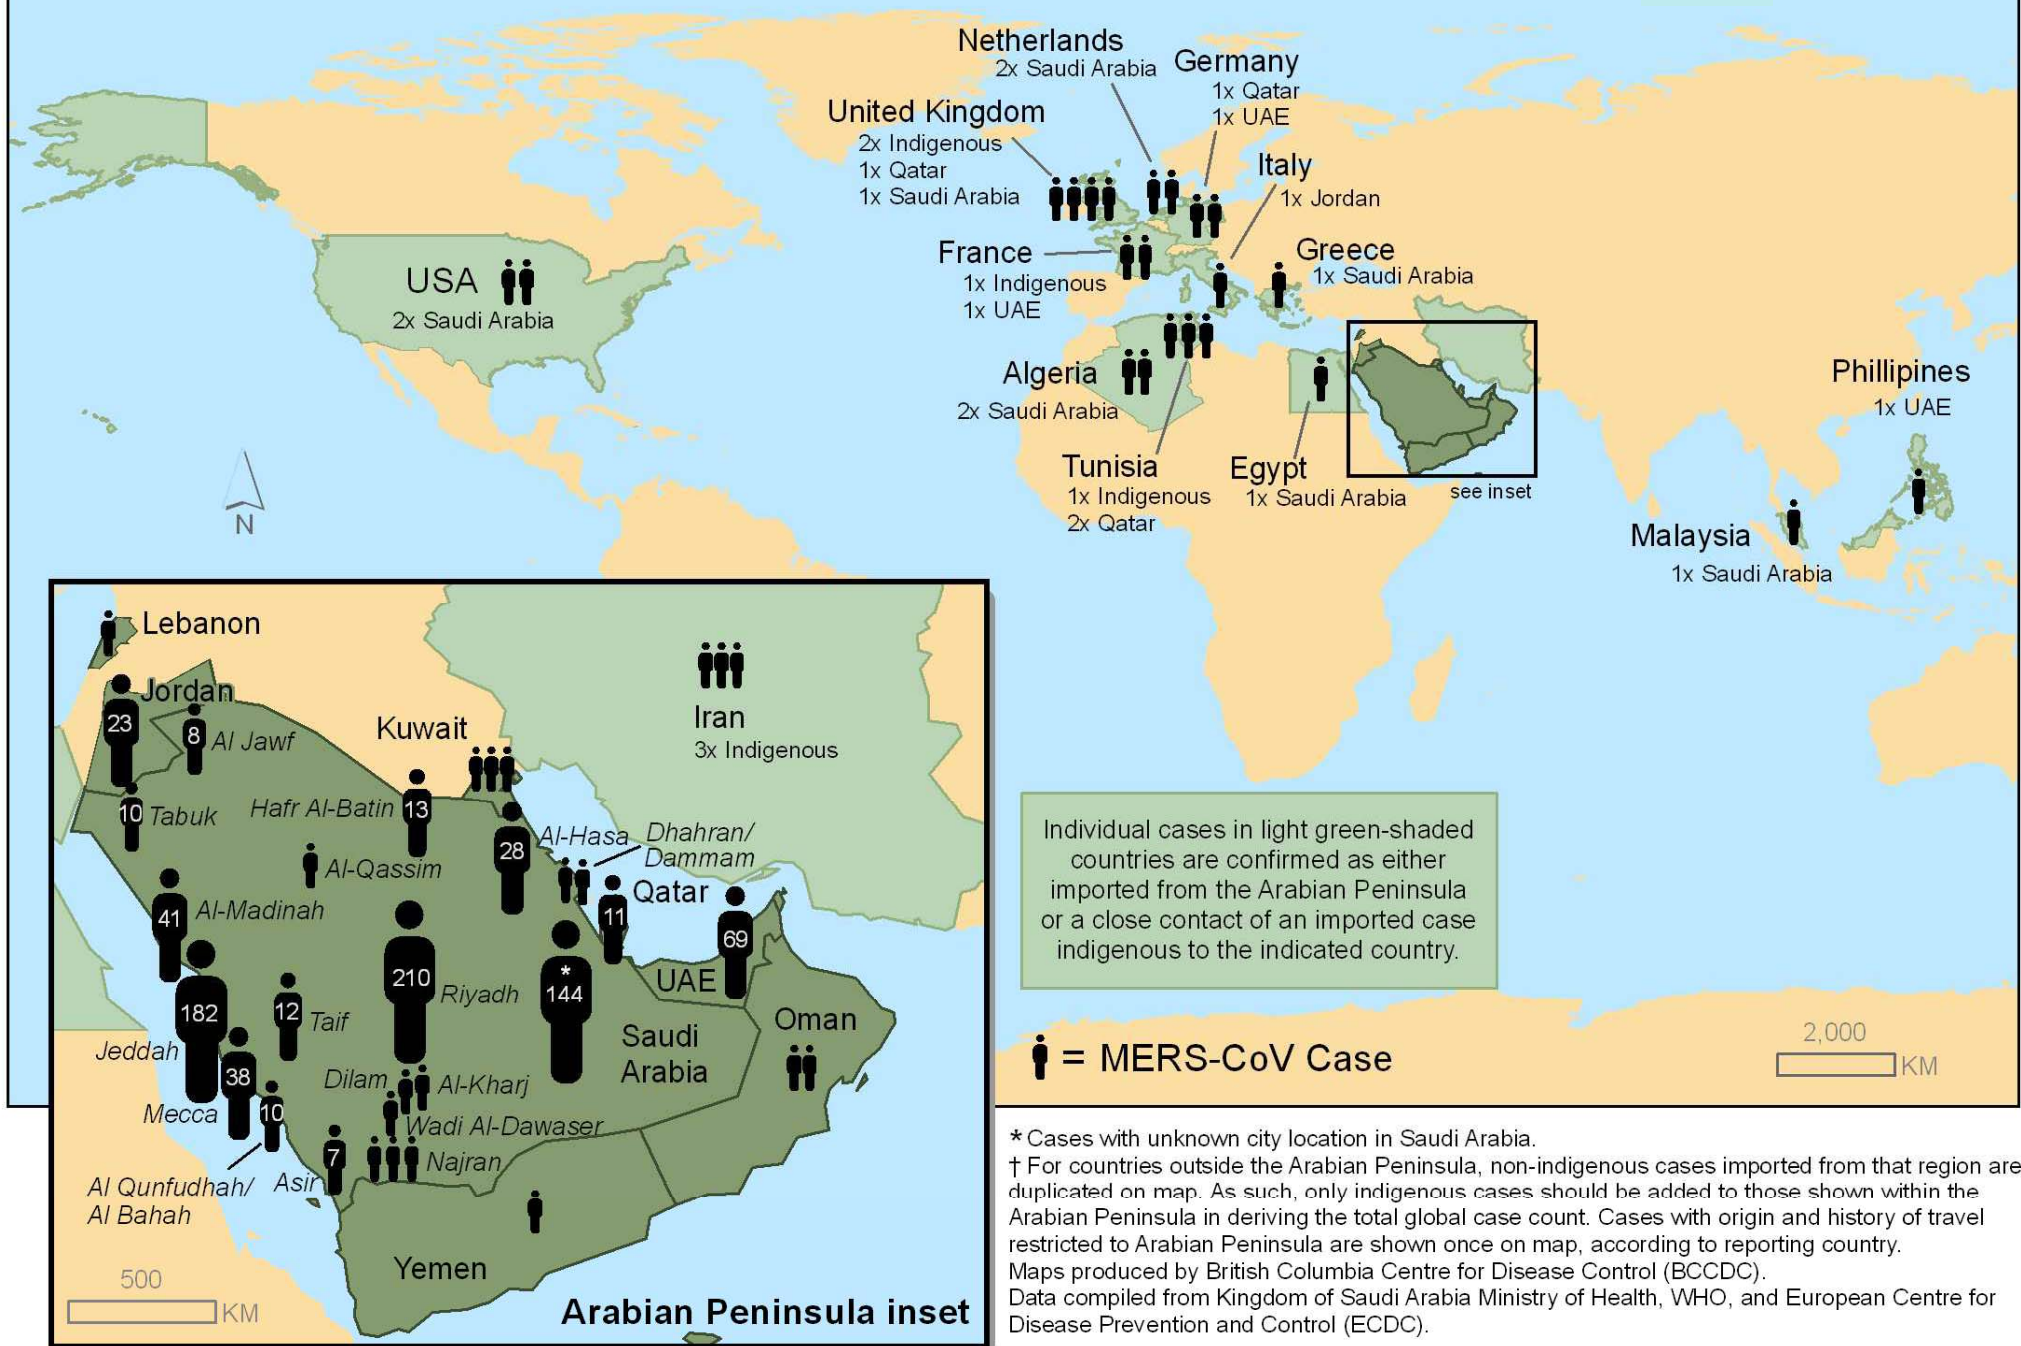

* Cases are shown by country of exposure (or by reporting country if place of exposure unknown) and by symptom onset date (or by reporting date if onset date unavailable or case is asymptomatic).

Note: June 2014 data shown is for partial month only.

MERS-CoV case activity as of June 17, 2014

case count: 830†

Individual cases in light green-shaded countries are confirmed as either imported from the Arabian Peninsula or a close contact of an imported case indigenous to the indicated country.

👤 = MERS-CoV Case

2,000 KM

* Cases with unknown city location in Saudi Arabia.
 † For countries outside the Arabian Peninsula, non-indigenous cases imported from that region are duplicated on map. As such, only indigenous cases should be added to those shown within the Arabian Peninsula in deriving the total global case count. Cases with origin and history of travel restricted to Arabian Peninsula are shown once on map, according to reporting country.
