Morphine use reported by clients at harm reduction distribution sites in the 2018 Annual Client Survey

Proportion of respondents who reported morphine use by Health Service Delivery Area

- 0% - 7%
- 8% - 13%
- 14% - 20%
- 21% - 26%
- 27% - 33%
- No data

Unreliable due to low survey response rate (under 20)

Equal interval classification.
Not comparable to other drug use maps.

Morphine reported used may be prescribed or from illicit sources. Of 70 participants that reported morphine use across BC, 23% reported usually having a prescription for it.
