Pharmacist Authorization to Administer Immunizations

MINISTRY OF HEALTH SERVICES

# NEWS RELEASE

For Immediate Release
2009HSERV0026-000515, injections, vaccines, H1N1
October 21, 2009

Ministry of Health News Release - October 21, 2009 (Injections / Vaccines / H1N1)

VICTORIA – Specially-trained pharmacists in British Columbia can now provide patients with vaccine injections.

“As we are facing both regular flu season and the H1N1 flu pandemic, pharmacists can now help administer the annual flu vaccine, including vaccinations for H1N1,” said Health Services Minister Kevin Falcon. “Expanding the role of pharmacists gives patients more choice for, and increased access to health care.”
Other Jurisdictions (as of 11/11)

- Canada
  - Trained pharmacists can administer vaccinations in British Columbia, Alberta, New Brunswick
  - Pharmacists in Manitoba, Ontario, Nova Scotia are expected to have authority to administer vaccinations once regulations are finalized

- USA
  - All 50 states allow vaccination by pharmacists
Pharmacist Qualification Requirements

- Registration on the College’s Full Pharmacist register
- Have successfully completed training from a College approved accredited training program
- Possess current certification in CPR and first aid from a recognized provider
Pharmacist Training

- Accredited Administration of Injections Program (prepared by the BC Pharmacy Association in collaboration with the College of Pharmacists of BC, BC Ministry of Health and BC Centre for Disease Control)
  - Immunization Competency Program for BC Health Professionals – on-line pre-study
  - Practical Administration of Injections for BC Pharmacists – in-person workshop

ImmunizeBC Strategic Framework (2007) Goals

- Investigate opportunities to expand the range of health care professionals providing immunization,
- Strengthen BC’s public health infrastructure, and
- Widen patient choice by increasing access to injection services.
Pharmacists and Immunization Working Group Mandate

- Strategic
  - Ensure adequate supply of pharmacist service providers
  - Support full implementation of pharmacists’ scope of practice to administer immunizations
  - Ensure stakeholder coordination and collaboration
  - Enhance pharmacists’ capacity to promote the benefits of immunization
Pharmacists and Immunization Working Group Mandate

Operational

- Make recommendations to BCIC about ways to utilize pharmacists to further public health goals
- Support regional health authorities and pharmacists in delivering PFV to BC citizens
- Share information on best practices about privately funded vaccine
- Promote consistent delivery of immunizations by pharmacists
- Provide support so pharmacists can effectively promote immunization programs

Influenza Vaccines 2011 – 2012 Season
Professional Q and A October 2011
Communication

- To pharmacists
  - College e-mail, web-posting
  - Association e-updates
  - Ministry newsletter, web-posting
  - UBC-CPPD web-posting

- To Health Authority team members
  - Via PIWG member

- On-going team communication via telephone and e-mail

- BCIC co-Chair updates
Lessons Learned

- Seek first to understand
  - Terminology
    - Schedule
  - Roles
    - Legislation
    - Responsibilities
  - Common ground
    - Access to care
  - What culture do you come from?
Pharmacists in Community Settings

- Licensed and accountable to regulatory body
- Customer focused
- Market forces and pressures
- Automation and technology
- Inventory management systems
- Accessible
  - Most BC communities
  - Evenings and weekends
Professionals in Public Health Settings

- Ministry + BCCDC + HA + Public Health Units
- Detailed processes
- Intricate and time-sensitive connections
- Inventory management requirements and pressures
- Documentation and record-keeping requirements and pressures
- Variability across health authorities
Going Forward

- Evaluation survey
  - Health Authority personnel
  - Pharmacists

- Streamlining processes
  - Across health authorities

- Availability of other vaccines
  - Extensive consultation process completed
  - Approval in principle
  - Work plan in development
Planning for the Future

- Desire is to make PFV available to eligible recipients from pharmacists under specific conditions and with specific procedures in place:
  - When recipients present to the pharmacy
    - Td, MMR, Hep A, Hep B – adult
  - To supplement school-based programs
    - Tdap, Varicella, Hep B, HPV, Men C Conj
  - During an outbreak
    - MMR, Hep A, Pertussis, Pneumo-23, Men C Conj
Planning for the Future (continued)

- Desire is to make PFV available to eligible recipients from pharmacists under specific conditions and with specific procedures in place:
  - Post-exposure immunoprophylaxis of household contacts
    - Men C Conj, Hep A, Men Quad Conj
  - On a case-by-case basis
    - Varicella (adults/others), Tdap (previously unimmunized adults), Td/IPV, IPV (travel indications)
In Summary

- Collaboration is key
- Relationships, trust and respectful communication are the building blocks
- All stakeholders have benefitted
Thank You

Barbara.GobisOgle@gov.bc.ca
