

Partners in Prevention:

- 19 participants in the breakout – a mix of industry, BCIC members and MHOs.
- 6 shots in 2000, 16 shots in 2004
- Phase I – 8 stakeholders, \$100, 3 regions
- Phase II – 58 MDs, 10 focus groups, 5 regions
- Phase III – 6 page survey, 1135/4552, 946 eligible
- 327 immunizing fully
- All support immunization
- Challenged by schedule, time, payment
- Use local PH, CME and CIG
- 50% paper, 50% electronic
- Implement the provincial immunization registry

Pearls from Breakout Session #6

Partners in Prevention (a BC-wide physician survey) results

- Record management is a major issue
- Conduct an analysis of the different models of immunization delivery
- Develop a provincial strategy for MD promotion, education, inventory, and distribution.
- Duplicate work of PIWG
- Diversify information dissemination: print, electronic, CME sessions
- Review remuneration for immunizations.
- Docs want patient handouts and timely info about program changes and new vaccines
- Report to PHAC
- Enhance partnerships
- Adult immunization is underdeveloped
