

Geographic Distribution of COVID-19 by Local Health Area of Case Residence

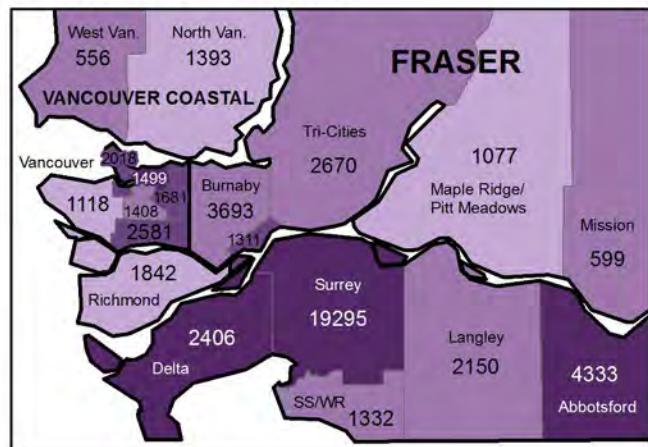

Cumulative Cases

January 2020 to January 2021

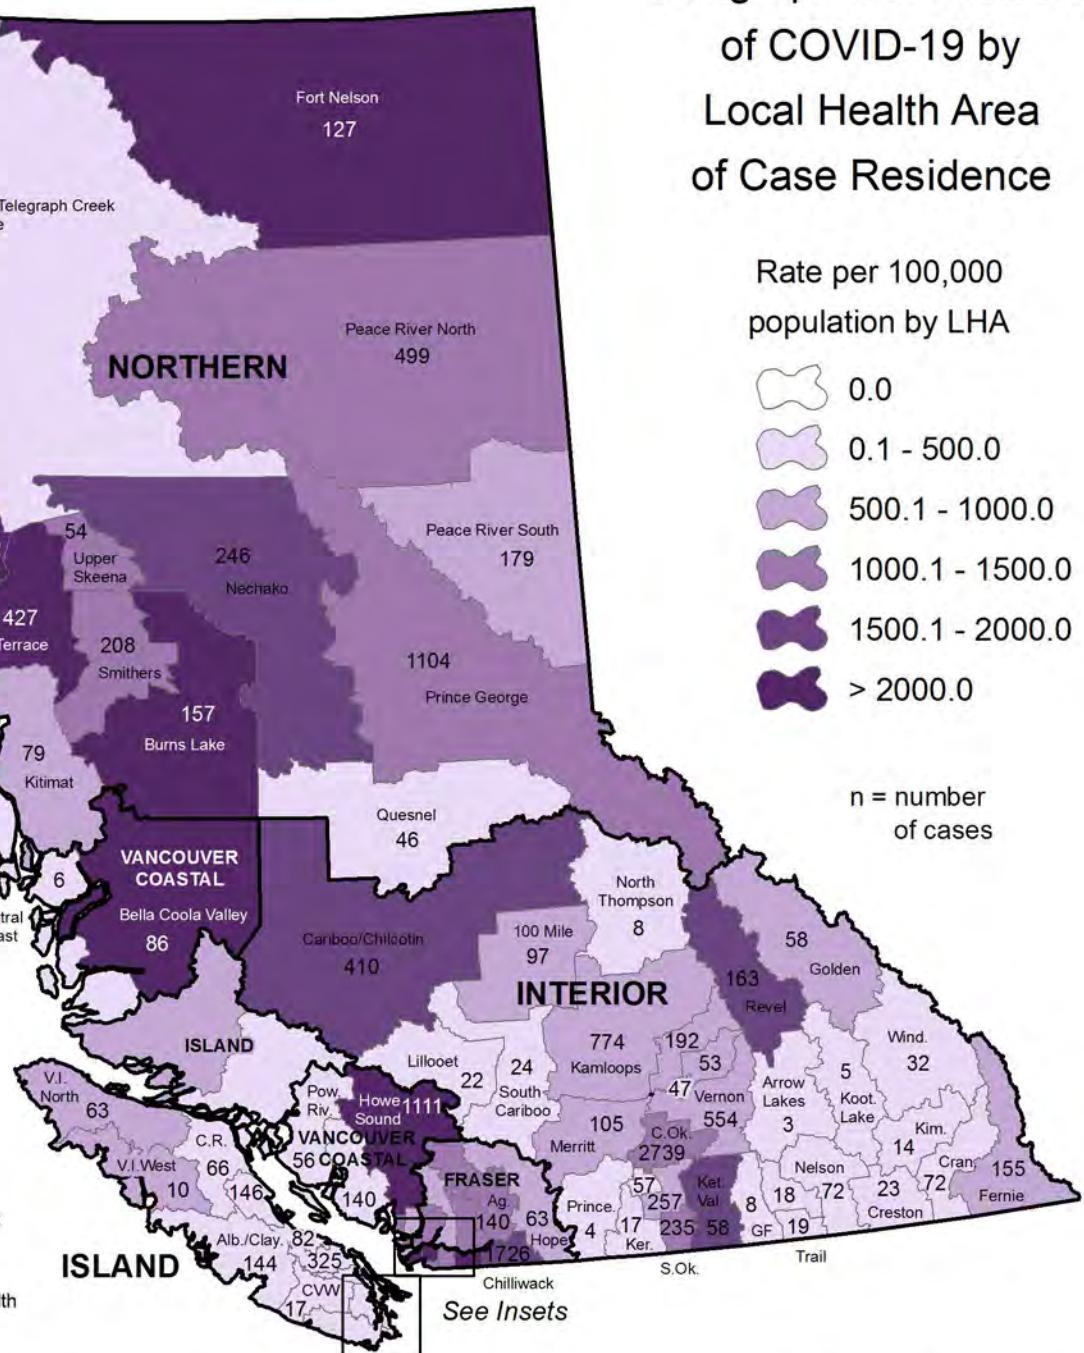

South Vancouver Island Inset

Greater Vancouver Inset

Additional cases with missing address information:
28 - Interior Health
5 - Fraser Health
90 - Vancouver Coastal Health
6 - Island Health
56 - Northern Health

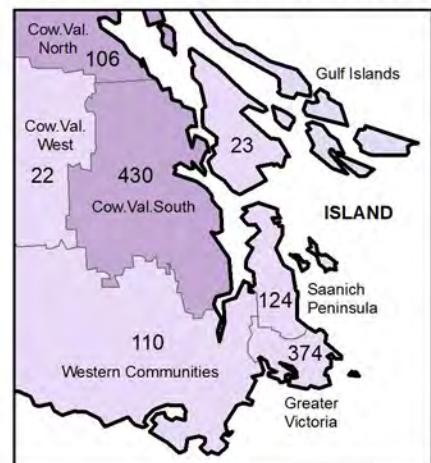

Notes: Cases are mapped by location of residence; cases with unknown residence and from out of province are not mapped. Data source: the 5 regional health authorities of British Columbia; we operate in a live database environment and case information from the health authorities are updated as it becomes available. How to interpret the maps: The map illustrates the geographic distribution of reported cases from January 1, 2020 to January 31, 2021. Local Health Areas (LHA) with higher rates are illustrated in darker colour shading. The number of reported cases appears in each LHA. Note that the number of cases in the LHA may not represent the location of exposure (e.g. people who acquired disease while traveling or working elsewhere), and that not all COVID-19 infected individuals are tested and reported; the virus may be circulating undetected in the community, including in areas where no cases have been identified by public health. Map created February 3, 2021 by BCCDC for public release.

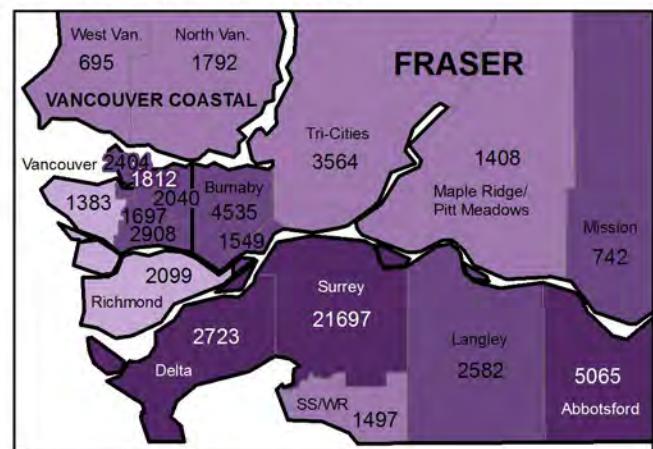

Geographic Distribution of COVID-19 by Local Health Area of Case Residence

Cumulative Cases
January 2020 to February 2021

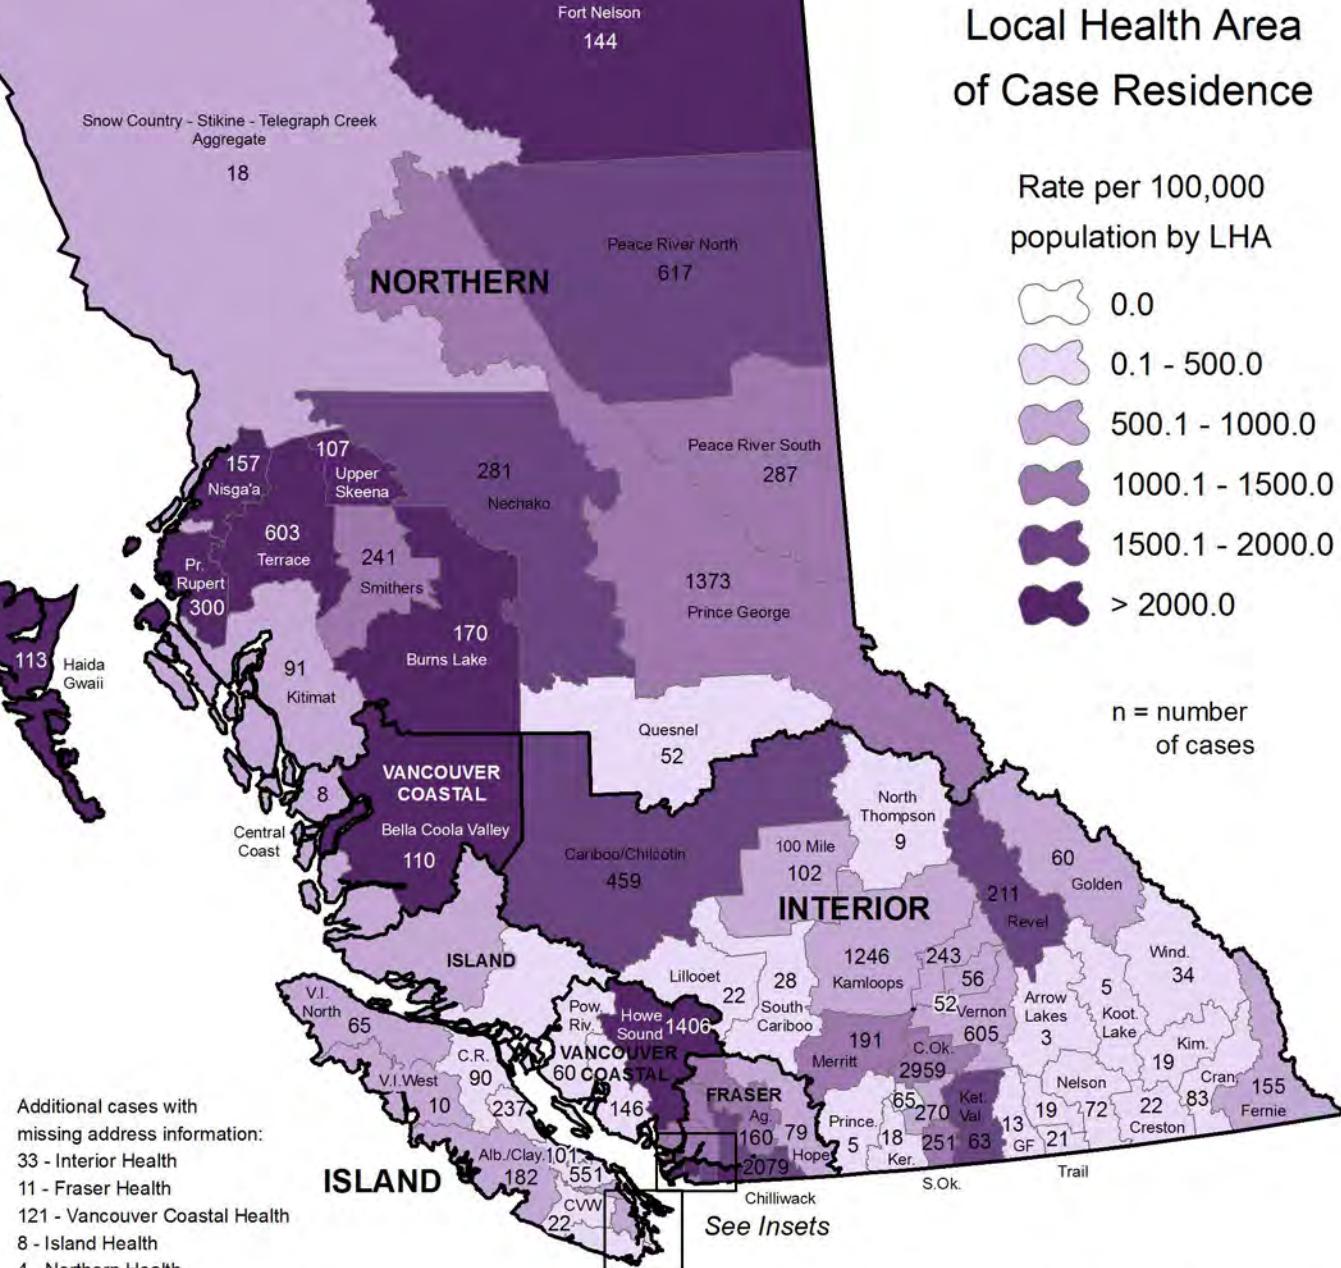

South Vancouver Island Inset

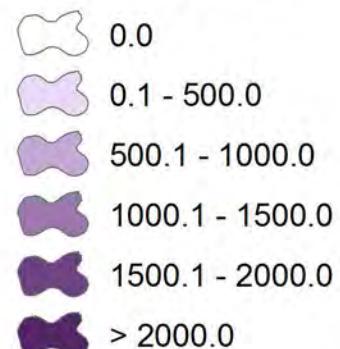

Greater Vancouver Inset

Additional cases with missing address information:
 33 - Interior Health
 11 - Fraser Health
 121 - Vancouver Coastal Health
 8 - Island Health
 4 - Northern Health

Rate per 100,000 population by LHA

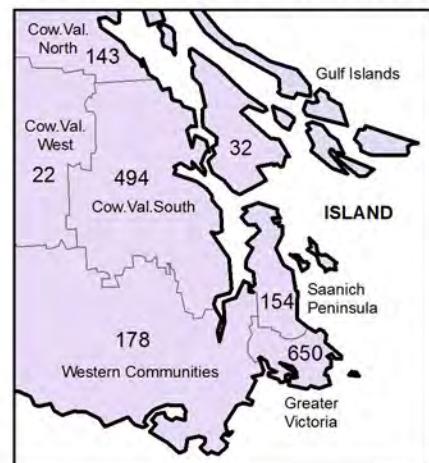

n = number of cases

Notes: Cases are mapped by location of residence; cases with unknown residence and from out of province are not mapped. Data source: the 5 regional health authorities of British Columbia; we operate in a live database environment and case information from the health authorities are updated as it becomes available.
