

Networking Opportunities for Post-Secondary Institutions

BC Centre for Disease Control
Provincial Health Services Authority

Post-secondary institution (PSI) leaders want more networking and connection across the province to tackle student food insecurity. This is a simple way to share information and ideas for solutions when resources are limited. Networks should be collaborative and sustainable so everyone benefits. This summary highlights findings from interviews with 12 PSIs across BC about the need for networking.

Networking Areas of Interest

Suggested Networking Formats

- Community of practice
- Open source Resource Hub

"100%. Yeah. I think there has to be more of [connection and collaboration]."

"We're kind of all out on our own little islands, unfortunately."

Key Considerations for Sustainability

- Having a "home" or anchor organization
- Having a clear purpose and structure
- Dedicated coordination and leadership
- Adequate resources
