

# High Tuberculosis (TB) Incidence Country List

Clients who report birth, residence, or travel in a country with a TB incidence of 50 cases per 100,000 population or higher should be considered relevant to the TB risk assessment.<sup>1</sup>

Because TB incidence changes over time, assessing risk based on past travel or residence can be challenging. The list below is derived from WHO TB country, regional, and global profiles and includes countries that have reported a TB incidence of 50 per 100,000 or higher within the past 15 years (2010-2024).<sup>2</sup>

Countries A-D	Countries E-L	Countries M-R	Countries S-Z
Afghanistan	Ecuador	Madagascar	Sao Tome and Principe
Algeria	El Salvador	Malawi	Senegal
Angola	Equatorial Guinea	Malaysia	Serbia
Armenia	Eritrea	Maldives	Sierra Leone
Azerbaijan	Eswatini	Mali	Singapore
Bangladesh	Ethiopia	Marshall Islands	Solomon Islands
Belarus	Fiji	Mauritania	Somalia
Belize	Gabon	Micronesia (Federated States of)	South Africa
Benin	Gambia	Mongolia	South Sudan
Bhutan	Georgia	Morocco	Sri Lanka
